

Propolis Extract

**New – Propolis Resin Alcohol-Free Liquid Extract
for powerful immune support**

Propolis is a resinous compound found in buds and barks of trees, which is collected and used by honeybees to keep their hives healthy, protected, and disinfected. The use of Propolis as a healing aid has been documented as far back as ancient Greece and the time of Aristotle.

The natural compounds found in propolis have shown to exert anti-bacterial, anti-inflammatory, anti-viral and anti-fungal properties. It is one of nature's richest sources of bioflavonoids and considered to be an excellent source of natural antioxidants to help protect the immune system.

Nature's Answer Advanced Botanical Fingerprint Technology® captures propolis and its important constituents the way nature intended.

Each 2ml serving of Nature's Answer Propolis delivers 2000 mg of propolis resin extract. This is a powerful concentrated extract, not a tincture that is diluted and less potent. So you get the true benefits of this wonder of nature.

SUGGESTED USAGE:

As a food supplement take 1-2ml (40-80 drops), 2-3 times a day in a small amount of water.

*Holistically Balanced | Alcohol & Gluten Free | Free From Artificial Sugars or Sweeteners! | Free From Benzoates
Free from GMO's | Vegetarian*
